

Algonquin Park Fisheries and Aquatic Ecosystem Information Sharing Session

Ontario Parks is collaboratively developing a new Fisheries and Aquatic Ecosystem Management Plan for what is now called Algonquin Provincial Park. Algonquin community members are invited to attend an open session lead by Ontario Parks and the Algonquins of Ontario (AOO) Consultation Office to share knowledge and discuss the background research and monitoring information that has supported this planning process, including:

- Algonquin Park aquatic ecology
- Fish species distribution
- Climate warming
- Invasive species

As the draft fisheries plan is still under development, this session will not include discussion on proposed management actions or regulatory changes for recreational anglers. Consultation on the draft plan will take place at a later date.

Questions or Concerns
Call ON Parks Office at 705-571-7438
or visit [OntarioParks.ca](https://www.ontarioparks.ca)

When: Sunday June 22, 2025
12:30pm to 4:00pm

Where:

Shady Nook Recreation Centre
80 Richardson Crescent, Pembroke

Light refreshments will be provided.

This session will provide an opportunity for Ontario Parks to learn from community members about their experiences with fisheries and aquatic ecosystems in the Park. For example:

- historical and recent fish and aquatic species observations
- changing lake/river conditions (e.g. earlier ice melt, drier conditions)

Thank you for your interest and we hope to see you there!
